Reasons for Allowance

2. The following is an Examiner's statement of reasons for the indication of allowable subject matter:

The claims are allowable over the prior art of record since the cited reference taken individually or in combination fails to particularly disclose a method for streaming scalable video including base layer frames and enhancement layer frames comprising the steps of selecting a number of enhancement layer frames to distribute the loss of bandwidth over; reducing a size of the selected number of enhancement layer frames to accommodate the loss of bandwidth; transmitting at least a portion of at least one of the enhancement layer frames for the given time interval, the at least one transmitted enhancement layer frame having been reduced in size.

It is noted that the closest prior art of record (Li US Patent no. 6275531) teaches a similar method for streaming scalable video, however, Li fails to teach or suggest *"selecting a number of enhancement layer frames to distribute the loss of*
